Nutrisafe[®] 2

Supporting the delivery of best practice

Nutrisafe[®] 2 is our complete and unique system that helps you meet the NPSA guidelines for safe, secure enteral delivery.

Safe

Nutrisafe 2 is incompatible with standard luer 6% taper devices. The lockable non-luer system reduces the risk of misconnection errors with no change to normal practice. The Nutrisafe 2 connector and the plastic cap tether have been designed to ensure it is safe for your patients.

Secure

The lockable system provides additional security. Accidental disconnection is virtually impossible. To disconnect the system you do not need to use force, you simply unscrew the device.

Confident

Colour-coded for easy recognition and size identification. The Nutrisafe 2 range features purple hubs and size related colour-coded caps, reducing the risk of accidentally attempting to connect devices intended for use with IV lines.

The unique Nutrisafe 2 secure lockable non-luer system gives you peace of mind that your patients are safe from misconnections and wrong route drug errors¹.

Comfortable

Designed with your patients in mind. The smooth shape was chosen specifically to eliminate sharp edges that could cause discomfort and markings on skin.

Helping Support **Best Practice**

We have worked with leading clinicians in the field of enteral nutrition and clinical education to develop the Nasogastric e-Learning program.

Developed to provide healthcare professionals with a comprehensive training package that covers the main elements of nasogastric tube insertion, care and maintenance.

The nasogastric program has been produced to reflect current best practice and national guidelines, as well as being peer-reviewed and evaluated by leading professionals in the area of enteral feeding and learning development.

The Complete **Solution**

We offer a wide range of syringes, extension tubes, drawing-up straws, syringe pumps and accessories.

We also provide continual support for healthcare professionals by offering mutually convenient complementary training, technical support and e-Learning. The added value of training is our commitment to you in support of best practice programmes employed within your hospital. Customer service and best practice is foremost in Vygon's approach and this extends to our product support and education programmes.

Speak to your Vygon representative today to find out how Vygon can help support best practice within your Trust.
