Nutrisafe2® Product Catalogue

Enteral Nutrition

The proven, safe, small and accurate enteral feeding system for neonates

Nutrisafe2®

The safe, small and most accurate nasogastric feeding product range for neonates

We have worked with leading clinicians in the field of enteral feeding to develop a complete range of nasogastric feeding tubes and accessories, allowing you to deliver the safest care for your patients.

- Small, lightweight, smooth connector surfaces specifically designed with neonates in mind
- Nutrisafe2 syringes are intended for oral and enteral application
- Delivers low dose accuracy of medication, without changing current policy and procedures
- Unique, proven design with 11 years global experience and 50 million connections globally every year
- Zero reported misconnections with any other small bore connector designs
- Accessories facilitate the preparation, transfer and administration of enteral fluids, providing a complete enteral system for neonates.

Enteral Feeding Tubes

Nutrisafe2 feeding tubes are available in PVC, PUR and silicone for enteral nutrition of neonates and children.

- Features excellent radiopacity and a closed distal tip with two lateral eyelets
- The safe, small lightweight Nutrisafe2 connector reduces risk of rhinitis and oesophageal erosion compared to larger and heavier connectors
- Renowned soft textured feeding tubes
- Easy to insert
- 40cm, 50cm and 75cm length tubes include markings every centimetre from 5cm to 35cm. The 125cm length tubes include markings every centimetre from 5cm to 70cm for post-pyloric feeding
- Colour-coded tethered caps indicate the size of the feeding tube.

Enteral Feeding Tubes

Offset syringe tip on large syringe sizes

Positioning the syringe in a syringe driver with the tip above the centre point ensures nutrient rich fats that are administered first upon commencement of feed.

Smooth tip, smaller sizes

Small, smooth, atraumatic surfaces for oral application.

1015 range

Accessories

Drawing-up straw - 817154, 817052

The Nutrisafe2 sampling straws are connected to a Nutrisafe2 syringe for drug sampling (code 817.052) or to fill the syringe with milk/milk formula (other codes).

Some sampling devices have a smaller bore for non-viscous solutions. Other sampling devices have a larger bore for fortified milk.

Syringe cap single and 8 pack - 828.01, 828.08

Purple coloured obturator for Nutrisafe2 syringes, preserving enteral fluids prior to administration.

Extension Tubing - 0368.152, 0368.1521

PVC extension tubing provides extended connections to pumps, allowing greater flexibility when used at the cot side.

Vented caps - 818.22, 818.62

Vented cap to be fitted on Nutrisafe2 syringes (20ml and 60ml) to enable gravity feeding and protecting enteral feed from contamination.

Sampling needle - 817.002

Designed to aspirate drugs from an ampoule, which must be administered orally or via a Nutrisafe2 feeding tube.

Filter Straw - 817.105

Filter straw with Nutrisafe2 connection and filter (5µm). Designed to aspirate fluids from glass vials and ampoules whilst removing particulate matter.

Feeding tube obturator - 829.01

Purple-coloured obturator cap for Nutrisafe2 feeding tubes.

Spike - 0281062

Spike featuring (at the proximal end) a male Nutrisafe2 connection with cap. When connected to a Nutrisafe2 syringe, this device allows drug samplings from fluid reservoirs.

Drip stand holder - 367011

Holder for 20ml and 60ml Nutrisafe2 syringes for gravity feeding.

Three-way stopcock - 580201

Allows secondary connection when intermittent medication must be given via a Nutrisafe2 feeding tube.

Vial access caps - 821.012,022

Available for vial necks of 14mm or 20mm diameter for the purposes of drug sampling without the use of needles.

Male to male connector - 368.22

Male to male Nutrisafe2 connector to transfer drugs contained in a Nutrisafe2 syringe into another Nutrisafe2 syringe, or to transfer vitamins contained in a Nutrisafe2 syringe into the syringe containing the baby's milk.

Nutrisafe2/ENFit adaptor - 0368.72

The Nutrisafe2/ENFit adaptor enables the connection between an administration set equipped with a female ENFit connector and a Nutrisafe2 feeding tube.

Nutrisafe2/ENFit adaptor - 0VEACC510

The Nutrisafe2/ENFit adaptor allows the connection of Nutrisafe2 sets for pumps and Nutrisafe2 syringes to ENFit feeding tubes.

Neonatal Grip-Lok™ - 58041 I

Fixation device with hydrocolloid adhesive for enteral feeding tubes and nasal cannulae.

The device features the Grip-Lok technology that allows it to re-open it in order to gain access to the tube to clean or reposition it.

The Grip-Lok fixation device can be cut in half in order to reduce its size and adapt it to the patient.

Taper connector - 368.12

This taper connector with Nutrisafe2 male connection is used when it is necessary to administer medications with a Nutrisafe2 syringe into a gastrostomy device.

Funnel adaptor - 368.02

To connect onto funnel tubing.

Y-connector - 368.42

The Y-connector allows secondary connection when medication must be given with feed.

Battle cap for sampling - 820.20, 820.22 and 820.28

For Sampling for 20mm, 22mm and 28mm vials.

Gastric aspirator - 534.082

A collection trap volume 25ml, with a cap that ensures a tight seal of the specimen sampling.

Also features a tube connecting the device to the suction source and a funnel connector.

The tube has a female Nutrisafe2 hub to connect the device to the Nutrisafe2 feeding tube.
