

Safe Closed System

Safe disconnection from an elastomeric or an electronic pump at he end of chemotherapy

Priming Qimomale

Prime the tubing according to your local protocols

Connect Qimoprime to Qimomale

Lightly screw the Qimomale onto the syringe - only turn the Qimomale 1/4 in rotation to avoid locking on completely - then prime as per protocol

Gently unscrew Qimomale from the syringe

Disconnect Qimoprime from Qimomale

Firmly screw the Qimomale onto the infusion line until you feel free rotation of the connection -this will ensure the Qimomale is locked and not removable.

Qimomale and Qimofemale are sterile medical devices class IIa, compliant with 93/42CEE directive as to appendix 2. Certification established by G-MED, notified body N°0459. Medical devices manufactured and distributed by Vyon.
